Effective, Monday, August 26, 2024, Ongwanada will be partnering with GeoTab Telematics.

- **What:**

- Telematics is a method of monitoring our vehicles using GPS technology and on-board diagnostics.

- **Why:**

- The objective of this partnership is to ensure the safety of our staff and supported individuals while commuting to and from destinations.
- These devices will track and locate all vehicles daily. They will also measure speed of vehicle vs posted speed limits, idle time (reducing our carbon footprint)

Benefits:

- **Driver and Passenger Safety:**

- We recognize our employees' at Ongwanada are our greatest asset. This driver-focused and fully customizable solution prioritizes your well-being, while minimizing risk and improving safety – on both sides of the wheel.

- **Maintenance Schedules:**

- By implementing this solution, we will have a more intelligent view of:
 - Vehicle Maintenance
 - Maintenance Schedules - proactive notifications when service is required
 - Adding longevity to our vehicles
 - Trouble Notifications - Vehicle accidents, system malfunction (engine etc.)

Installations will begin in all Ongwanada Vehicles on Tuesday, August 27, 2024 and will be carried out over a 2 week period.

To ensure that the installer has access to each vehicle, Managers/Supervisors will be contacted prior to every installation.

Thank you,

Darlene Ryan
Senior Director – Finance
